

# WELL SERVICES SPECIALISTS

**WELL SERVICES SPECIALISTS** are an important part of the drilling and production team.

Examples of their job duties include monitoring mud flows and mixing fluid chemicals required by the well, and operating hydraulic systems to pump chemicals or cement into the well to ensure normal operation.

**COLLEGE OF THE NORTH ATLANTIC**

- COMMON FIRST YEAR
- PETROLEUM SPECIALIZATION IN YEARS 2-3
- 12 WEEK WORK TERM

**PETROLEUM ENGINEERING TECHNOLOGY PROGRAM**

Students gain knowledge and skills related to interpreting data, operating and maintaining equipment, and assisting with many aspects of OIL AND GAS PRODUCTION.
